

# PFS Logistics – 2017 Produce Season Surcharge

In an effort to minimize the disruption often associated with the introduction of new rates, especially around Produce Season, we at PFS Logistics are introducing a Produce Season Surcharge that will allow us to keep our current LTL rates in place and to simply apply a “surcharge” on LTL freight originating in California. Additionally, it will also allow us to more quickly remove it as soon as the demand associated with Produce Season has lessened.

Effective **Monday, May 29, 2017** we will apply a “Produce Season Surcharge” on all LTL orders originating in California (15%).
